

NetGain Motors, Inc.

800 South State Street / Suite 4 / Lockport, IL 60441 / 630-243-9100 / 630-685-4054 (FAX)

Introduction

**The world keeps changing ...
... and NetGain Motors, Inc. is there.**

With a continuous desire for new technology and the advancement of electric and hybrid vehicles, NetGain Motors, Inc. has been a preferred supplier of specialty, series wound DC motors for EV's since 1998. NetGain has teamed with Warfield Electric Company of Frankfort, Illinois to develop a comprehensive line of DC electric motors specifically designed for the unusual operational dynamics of an electric vehicle. The outcome has been the very successful line of **WarP™ Motors**. We currently offer **WarP™ Motors** in 7", 8", 9", 11" and 13" diameters, plus the line of **Impulse™ Motors**, and our unique **TransWarP™ Motors** in 7" 9" and 11" diameters.

You, our great dealer network, continues to grow worldwide. Our focus continues to be to supply you value with the best EV motor for your customers. Even though our motor performance record is outstanding, we are always looking to improve our motors performance and capabilities. This year is no exception because we are looking to re-engineer our most popular motor, the **WarP 9™** and introduce new motors based on dealer and customer feedback.

This package will provide you even more information than in the past – pictures, pricing, & performance data to name a few. Remember to look at our **Co-op Advertising Plan** and utilize it with our new promotional item line. We are also providing you motor sell sheets for your customers, an item you have been requesting. These sheets can be customized to include your company name and address. We can even print and send them to you upon request.

Please let us know what enhancements you would like included in future versions of this Dealer Manual.
